- Prolongs Tool Life
- High Speed Machine & Hand Cutting

Oil In 1

Dark Cutting Oil

ComStar's Oil In 1 meets the professional's range of requirements with one cutting oil. Recommended for steel, brass, aluminum, black, or galvanized pipes. It won't stain and can be used for hand or high-speed machine threading. Oil In 1 prolongs machine life and maintains tools, dyes, and chasers at their clean-cutting best by providing superior full circumference lubrication with the absolute minimum build-up of heat. Developed by IPC in conjunction with two major oil companies, Oil In 1 has been laboratory and field-tested for heat transfer characteristics, lubricity, "reusability", wearability and other cutting results. In every test, it clearly out-performed other cutting oils.

DIRECTIONS:

1. Make certain dies and chasers are in top condition.
2. Apply liberally to cover surface to be cut.
3. Make sure the oil is in constant contact with the dies while the work is in progress.

CONTENTS: Distillates, petroleum, solvent-dewaxed light paraffinic (CAS# 64742-56-9)
